[FAQs](#)

Please note: The trip and waypoint management functions of this product work with nearly all GARMIN GPS units, excluding the GPS100 family and panel mount aviation units. The map download feature of this product is recommended for use with the GPS III Plus, NavTalk, GPS 12MAP, and GPSPMAP 162/168. It is compatible with StreetPilot GPS, StreetPilot ColorMap, GPSPMAP 295, and eMap, which require a blank GARMIN data cartridge to upload map data to these compatible units.

The MapSource™ WorldMap CD-ROM provides coverage worldwide with basemap-level detail, including political boundaries, cities, towns, major motorways and/or interstates, and principal highways; lakes, major streams, and rivers; and urban areas and railroads. WorldMap displays excellent coastline detail which includes many offshore islands, as well as worldwide nautical nav aids such as daybeacons, radiobeacons, RACONs, fog signals, lights, buoys, and other nav aids. Also shown are U.S. Interstate Exits Information, such as service stations, gas stations, restaurants, hotels, campsites, hospitals, banks, and more. WorldMap includes trip and waypoint management functions that allow you to transfer waypoints, routes, and tracks between your PC and nearly all GARMIN GPS units while viewing basemap-level maps on your PC screen. With a map download-compatible GARMIN GPS, WorldMap will also allow you to load the map detail listed above.

GARMIN list price: \$116.65 Buy

Please note: MapSource software that does not display a red buy button beside it may be temporarily out of stock or not yet available. If you would like to check availability or find a comparable product, please e-mail our cartography department cartography@garmin.com or call 1-800-800-1020.
